Running Your Office Syndicate

A quick guide to Syndicate — for organisers and new members

Split the ticket. Track every share.

WELCOME

What is Syndicate?

Syndicate replaces the messy group chat and spreadsheet with one simple, shared place for splitting lotto tickets with friends, family, or workmates — so easy that anyone can pick it up in minutes.

Track contributions

See exactly who's paid and who hasn't, at a glance.

Winnings split themselves

Enter the result once — everyone's share is calculated instantly.

Chat & photos, one place

Ticket photos, results, and group chat, without a separate thread.

OVERVIEW

What you'll learn

1

Creating your account

Sign in with a magic link or a password — no complicated setup.

2

Starting a syndicate

Name it, set a jackpot estimate, and you're ready to go.

3

Inviting your group

Share one simple code — anyone can join in seconds.

4

Tracking contributions & results

Who's paid, who hasn't, and the official draw result.

5

Getting paid out

Winnings split automatically, exactly the way you put in.

STEP 1

Create your account

Sign in with just your email

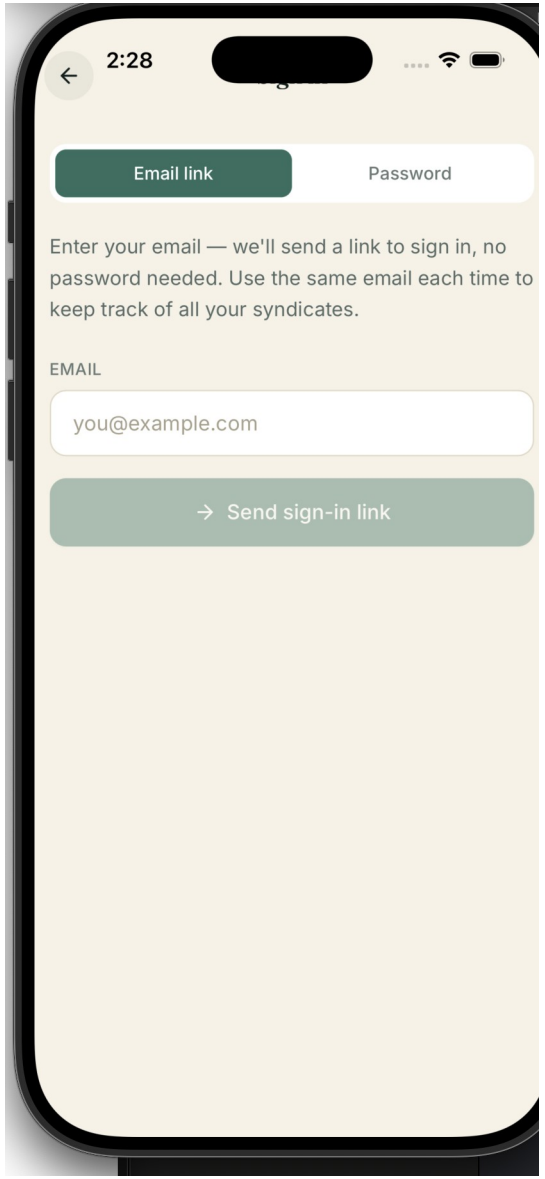

We send a magic link — no password required to get started.

Prefer a password?

You can set one any time from your Profile screen.

Use the same email every time

That's how all your syndicates stay linked to one account.

STEP 2

Start a syndicate in under a minute

Syndicate name

e.g. “Pool 9 — Friday Powerball”

Jackpot estimate

The advertised prize for the upcoming draw

Your name (organiser)

So your group knows who's running it

Draw date & entry deadline

Both optional — handy reminders for your group

Country / currency

Sets the right currency symbol and formatting

One-time $3.00 service fee, paid securely via Stripe — this covers using the app only, never your ticket money. Payment for the actual ticket happens between your group directly.

STEP 3

Share one code, and you're all in

YOUR INVITE CODE

K7QXM

Share & invite others

- Text it or drop it in your group chat
- Anyone with the code joins in seconds
- No app download, no account creation hoops

Only share your invite code with people you know personally — friends, family, or workmates. Real money changes hands between your group, so keep the circle trusted.

STEP 4

No fixed price — everyone puts in what they like

Alex puts in $10, Sam puts in $50 — it doesn't matter. As each person enters their amount, Syndicate works out their exact percentage share of the pool automatically.

JACKPOT	PARTICIPANTS	TOTAL POOL	CONFIRMED RECEIVED
$30,000,000	8	$164.00	$164.00

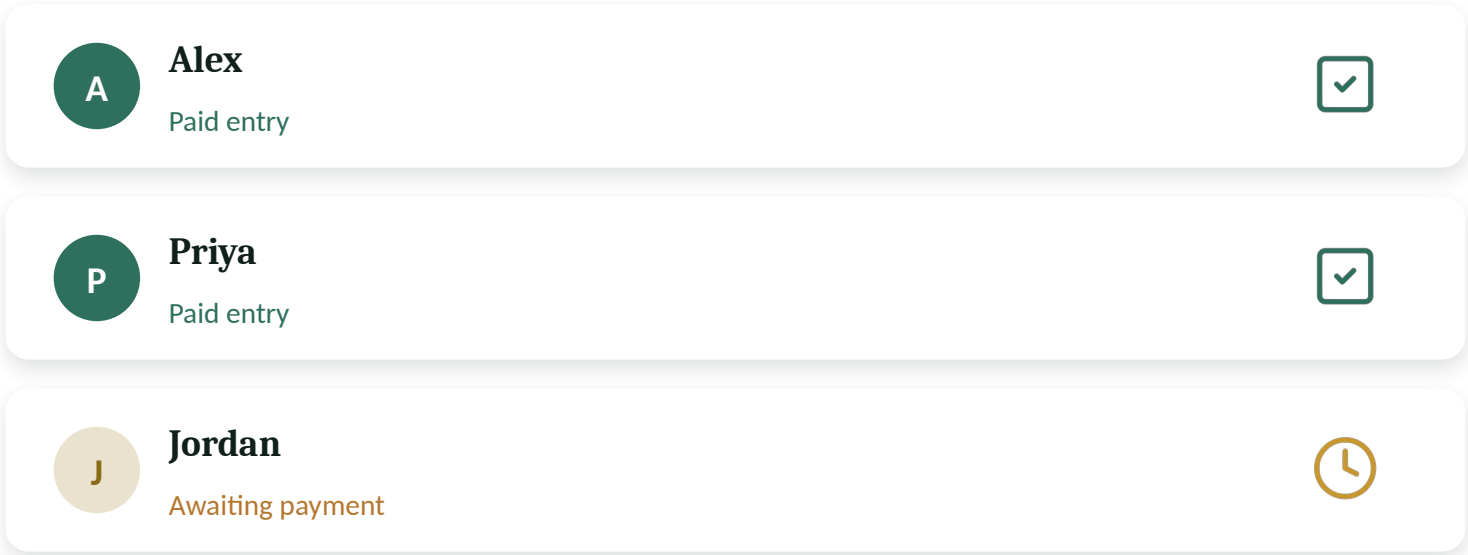

Illustrative example — your dashboard shows live numbers for your own syndicate.

The dashboard updates instantly as people join and contribute — no refreshing, no manual tallying. Everyone in the syndicate sees the same live numbers.

STEP 5

See exactly who owes what

Unpaid first | Name A–Z | Winnings

Add a participant

For anyone joining who isn't in the app yet.

Merge manually

Record a cash contribution someone handed you.

Illustrative example with placeholder names.

STEP 6

Keep the whole group in the loop

Syndicate chat

A built-in group chat for your syndicate — no separate thread needed.

Ticket & result photos

Snap a photo of the actual tickets or the draw result and attach it for everyone to see.

Visible to everyone, all the time

Every member of the syndicate sees the same chat and photos — nothing hidden.

STEP 7

Enter the result once — done

As soon as the draw happens, the organiser enters the official result — even $0 if the pool didn't win. Every participant's share is calculated instantly from what they actually put in. No manual maths, no arguments.

1

Tap “Enter draw results”

Found right on your syndicate's dashboard.

2

Enter the actual winnings

Whatever the official result was — including a $0 result.

3

Shares calculate instantly

Every participant sees their exact payout straight away.

STEP 8

Winnings, sorted automatically

Potential winnings, per person

Everyone's exact payout shows next to their name, calculated from their share.

Cash out & mark payouts

The organiser records payouts as they're sent — clear and visible to the group.

Roll over or close the pool

Rolling into the next draw or closing out — either way, tidy and automatic.

GOOD TO KNOW

A few tips for a smooth syndicate

Only invite people you know and trust personally.

Real money changes hands between your group — keep the circle known.

The ticket purchase happens outside the app.

Syndicate tracks contributions and results — you still buy the ticket as usual.

Everyone sees the same numbers, in real time.

No more spreadsheets or group-chat guesswork about who paid what.

Enter results as soon as the draw happens.

Shares calculate correctly and instantly the moment the result is in.

Ready to start your first syndicate?

Takes less time to set up than it does to explain to your mates why you need their bank details.
